

CF-30

< Features

- This machine can extract and fill antifreeze.
- Equipped with a water tank, it can automatically cycle and clean the engine, and can exchange antifreeze simultaneously.
- Large flow design to speed up the cycle.
- The 5-micron filtration system automatically eliminates the air bubble in the cooling system.
- Simple operation, safe, fast, and wide range of applications.
- This model can be customized into pneumatic or electric.

< Technical Parameter

Pneumatic / electric	AC220V 50HZ
Weight	38KG
Working pressure	60PSI
Size	360 × 298 × 922
Scope of application	small and medium-sized steam and diesel vehicles

CF-50

< Features

- It is equipped with a water tank, which can automatically circulate and clean the cooling system and can replace the antifreeze in an equal amount.
- Quantitatively add antifreeze and quantitatively recover antifreeze.
- One-button operation, electronic volumetric measurement, high precision.
- 10-inch touch microcomputer control to ensure accurate and equal replacement.
- Each function is fully automatic, fast and efficient.
- The replacement is more thorough. This machine supports cold car replacement as well.
- Equipped with a full set of European car connectors

< Technical Parameter

Voltage	DC12V
Maximum power	150W
Oil tank	19L × 2
Noise	<50db
Equal replacement error	±100g
Size	500×650×1100

CF-40

< Features

- Two clearly marked valves and an easy-to-read gauge make this machine very easy to use.
- Sight glass clearly shows the amount of coolant in the waste tank.
- The 5-micron filtration system automatically eliminates the air bubble in the cooling system.
- Simple operation, safe, fast, and wide range of applications.
- This model can be customized into pneumatic or electric
- Equipped with a full set of European car connectors.
- This machine supports cold car replacement.
